PROFESSIONAL SUMMARY

Experienced Software Developer with **3+ years of experience** building clean, fast, and user-friendly web applications. Skilled in **React.js, JavaScript, PHP, Node.js, MySQL, and MS SQL**, with a strong focus on delivering smooth user interfaces and reliable functionality. Experienced in creating ERP systems, dashboards, and automated tools that improve business workflows. Known for writing clean, maintainable code and working closely with teams to turn ideas into practical solutions. Always learning and improving, with an interest in modern front-end testing tools.

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, jQuery, Bootstrap, React.js (Hooks, Context API, Functional Components, Component Lifecycle)
- Backend: PHP, Node.js, Express.js
- Testing & Debugging : Browser DevTools , performance testing & optimization
- Database: MySQL, MS SQL
- Version Control : Git, GitHub
- APIs & Integrations: REST APIs, AJAX, Razorpay, MailChimp API, Google reCAPTCHA
- Other Skills: SEO Basics

PROFESSIONAL EXPERIENCE

Software Developer
Bluemango Solutions Pvt. Ltd. | August 2024 – January 2026

- Optimized web performance and security by implementing SEO best practices and Google reCAPTCHA across key pages.
- Streamlined business operations by consolidating admin data workflows into a centralized dashboard.
- Spearheaded the development of a robust ERP & Stock Management System with modules for SO/PO processing, production tracking, real-time inventory monitoring, automated invoice creation, and internal stock transfer management.

Software Developer
Kalash Infotech | August 2022 – July 2024

- Designed ERP dashboards and login systems using PHP, JavaScript, MySQL, and jQuery.
- Automated fee receipt generation and integrated MailChimp and WhatsApp APIs for communication.

- Developed a task and invoicing ERP dashboard with Excel report generation functionality.
- Integrated Razorpay for secure online payments and automated email/WhatsApp notifications.
- Created RESTful APIs for frontend-backend communication and developed a test module with automatic result delivery.

PROJECT HIGHLIGHTS

- **EDJ ERP:** Built login systems, dashboards, fee receipt automation, and integrated email/WhatsApp APIs.
- **Assignment Tracker:** Developed dual dashboards for task tracking and invoicing with Excel report export.
- **ERP & Stock Management:** Includes inventory tools, invoice automation, stock transfer workflows, production tracking, and SO/PO management.
- **Secure Payment Integration:** Integrated Razorpay to enable secure online payments and real-time transactional communication.
- **Test Module Automation:** Developed a fully automated student test module with instant scoring and result delivery through mail .
- **Visitor Management System**: Created a digital visitor registration system, visitor pass generation, and admin panel for real-time monitoring and history tracking
- **Google Sheets Integration**: Built a PHP-based form that stores submissions directly into Google Sheets using Google Sheets API, enabling real-time data collection and tracking without a traditional database
